DETAILED ACTION

Claims 1-39 are pending. The information disclosure statement filed August 4, 2004 has been received.

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-17, 19, drawn to a composition.

Group II, claim(s) 18, 20-21, and 26-27, drawn to a method of making a composition.

Group III, claim(s) 22-25, drawn to methods of making a powder and the power made.

Group IV, claim(s) 28-39, drawn to methods of making a tinted plastic, polymer or resin and the corresponding tinted plastic, polymer or resin.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the expression "special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art. The Durham reference is clear evidence that each of the claimed

Art Unit: 1712

inventions, considered as a whole, do not make a contribution over the prior art and therefore do not meet the requirements of PCT Rule 13.1 and 13.2 as having the same or corresponding "special technical features".

Since the groups lack unity, restriction between them is deemed proper.

Election of species

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

(I) (1) Cationic quaternary ammonium compounds, (2) cationic quaternary phosphonium compounds, and (3) cationic ternary sulfonium compounds;

(II) said cationic compound may have the function of (1) a dye, (1) pigment, (2) catalyst, (2) redox agent, (3) medicinal substance;

(III) (1) clays and (2) zeolites;

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Claim 3 correspond to the use of zeolite.
Claims 4 and 10 correspond to the use of clays.
Claims 11, 12, 16, 22-25 and 28-39 correspond to the Dye/pigment,
Claims 13 corresponds to the catalyst,
Claims 14 corresponds to the redox agent, and
Claims 15 and 17 correspond to the medicinal substance.

The following claim(s) are generic: 1-39 are generic to at least one of the components set forth in (I)-(III).

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the expression "special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art. The Durham reference is clear evidence that each of the claimed inventions, considered as a whole, do not make a contribution over the prior art and therefore do not meet the requirements of PCT Rule 13.1 and 13.2 as having the same or corresponding "special technical features".

Since the groups lack unity, restriction between them is deemed proper.

5. A telephone call was made to Douglas A. Miro on July 21, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
